Forecast for Friday 26 Nov 2021

Weather: A few clear spells with showers through the early hours. Further showers and a few sunny spells through the morning, the showers becoming heavy at times and may merge to give a longer spell of rain, sleet or summit snow around the middle of the day. Further showers through the afternoon and evening these turning increasingly to snow, even at relatively low level, the showers merging to give a longer spell of occasionally heavy sleet or snow later.

Chance of cloud free mountain/hill tops above 700m: Around 75% falling to 30% for a time around the middle of the day. Chances fall close to zero in evening

Visibility: Occasional cloud, becoming periods for a time around the middle of the day, above about 600m then periods or persistent cloud above 450-600m in evening. Otherwise visibility very good falling to several kilometres in sleet or snow showers and sleet and a kilometre or less in any heavier snow later.

Meteorologist's View

Gusts around 65mph through early hours and then around 80mph in the evening over ridges and summits. Increasing significant chill effect, especially at higher elevations.

Forecast for Saturday 27 Nov 2021

Weather: Heavy sleet or snow clearing soon after midnight then mainly dry and clear overnight. Then a bright day with some good spells of sunshine and just a few snow showers.

Maximum wind: Northerly or northwesterly 45-55mph, with gusts around 80mph over ridges and summits, easing 30-40mph by dawn, gusts around 55mph over ridges and summits, and then gradually easing 20mph through the day. Severe chill effect in the very strong winds.

Chance of cloud free mountain/hill tops above 700m: Chances improve through the early hours to become around 75% by dawn.

Visibility: Persistent cloud above 450-600m becoming occasional above 600m by dawn. Otherwise visibility very good falling to just a few kilometres in snow showers and less than a kilometre in heavier overnight snow.

Temperature: **Valleys:** Around plus 2 or 3 Celsius at dawn rising to plus 5 Celsius by day
At 700m: Around minus 3 Celsius.
Freezing level: Around 600m falling 300m to 450m.
